

# **HORSEPOWER<sup>®</sup>** **MINERALS** **PLUS BLOCKS**

Cold pressed high concentrate  
**mineral blocks** for horses only.  
Contains all essential minerals  
& trace elements **+ Zeolite**

MINERALS PLUS BLOCKS

## **CONTENTS** Per kg

Calcium	190 g
Phosphorous	50 g
Molasses	100 g
Salt	200 g
Canola Meal	20 g
Iron	1800 mg
Manganese	2650 mg
Sulphur	5300 mg
Zinc	2460 mg
Copper	700 mg
Cobalt	10 mg
Selenium	15 mg
Iodine	15 mg
ZEOLITE	33 g

## **DIRECTIONS FOR USE**

- Block may be placed in feed bin or directly on the ground
- One 5 kg Block per 1 – 2 Horses or One 20kg Block per 10 Horses
- Consumption rate 40-100g/day. Some animals may initially exceed this amount. Intake normally decreases to 40 – 100g within two weeks
- Not to be fed if horses are grazing Heliotrope or Patterson's Curse

For use in horses only.  
Not to be fed to other stock.

## **BENEFITS**

### **The Building Blocks of good nutrition.**

Normal mineral blocks are designed for cattle and sheep and are too hard for the soft tongues of horses. Horsepower blocks are softer and made specifically for horses only.

Other blocks have up to 98% salt but Horsepower blocks are packed with minerals and trace elements and only 20% salt.

High 19% Calcium content to boost intake of this critical mineral which is commonly deficient especially in pasture based diets.

Zeolite is included as a bio available source of Silica for connective tissue strength and also to neutralise mycotoxins from moulds which may contaminate hay and pasture.

## **PACK SIZES**

Available in the following pack sizes:  
Blocks 5kg, 20kg
