

High Protein, Low Starch, Low NSC extruded **complete feed** for Weanlings & Yearlings

HORSEPOWER

EXTRUDED

LOW STARCH GROWER

FEEDING RATE PER DAY:

Weanlings	2 kg
Yearlings	3 – 4 kg

INGREDIENTS

Canola Meal, Lupin, Millrun, Calcium Carbonate, Salt, Vegetable Oil, Zeolite, Bentonite, Horsepower Trace Element & Vitamin Premix.

DIRECTIONS FOR USE & FEEDING RATE

- Adjust intake gradually and avoid sudden increases/spurts in growth rate
- Meadow, Clover or Grass Hays are preferred. If Lucerne hay is used ensure some wheaten hay or chaff is made available also.
- When young horses are boxed or kept in small yards ensure chaff is available.

Low starch high protein feeds may also be suitable for use in aged horses and those prone to digestive upsets or Laminitis.

CONTENTS per kg

Digestible Energy	13MJ	Magnesium	0.8%	Vitamin B6 Pyridoxine	10mg/kg
Protein	24%	Iron	345mg	Vitamin B1 - Thiamin	22mg
Lysine	3.6%	Zinc	285mg	Vitamin B2 - Riboflavin	3.8mg
Methionine	0.7%	Copper	80mg	Vitamin B3 - Niacin	220mg
Starch	12%	Manganese	340mg	Vitamin B5 -	
NSC	18%	Sulphur	3000mg	Pantothenic Acid	12mg
Crude Fat	6.3%	Cobalt	2.1mg	Biotin	640mcg
Crude Fibre	8.7%	Selenium	1.4mg	Folic Acid	1135mcg
Calcium	1.4%	Iodine	1.0mg	Choline	1965mg
Phosphorus	0.8%	Vitamin A -	6150IU	Zeolite	10g/kg
Potassium	0.9%	Vitamin D3	1000IU	NOTE: Starch and NSC may vary due to variable levels in raw materials.	
Sodium	0.4%	Vitamin E	66mg		

BENEFITS

THE LOW STARCH ADVANTAGE FOR GROWING HORSES. Traditional feeds made from grains and by-products derive energy from high starch and Non Structural Carbohydrate (NSC) content. This tends to favour the development of Insulin Resistance in pregnant mares and their offspring.

In turn, insulin resistance may result in higher rates of orthopaedic diseases like OCD in foals and yearlings. **This feed contains very low levels of starch, sugars and NSC.** Abundant energy is drawn instead from oil and fibre and combined with very high quality protein to safeguard against Insulin Resistance and Developmental Orthopaedic Disease in foals and yearlings. Like all Horsepower feeds it contains high levels of minerals and trace elements to help maintain peak health and condition.
