

# OMEGA E OIL

## HORSEPOWER *Plus*

# Performance Oil for Horses

enriched with **Natural Vitamin E**

OMEGA E OIL

### BENEFITS

**NATURAL** cold pressed GM Free Flaxseed oil with no added bleaches or chemicals.

**COOL ENERGY** – Oils can substitute for carbohydrates in the horse's diet and assist in the management of insulin resistance. Flaxseed oil has the highest level of beneficial Omega 3 fatty acid of the commonly available vegetable oils. Omega 3 cannot be manufactured in the horse's body but is vital for the formation of cell membranes and plays a role in moderating inflammation and blood clotting.

**SHINE.** Omega 3 fatty acids help maintain a normal healthy skin and glossy shiny coat.

**STAMINA.** Vitamin E is an antioxidant which helps prevent damage caused by the free radicals formed as a by product of energy metabolism. May assist with recovery following strenuous exercise.

### DIRECTIONS FOR USE & FEEDING RATE

Mix the amount to be fed well with the horse's normal ration.

Omega E oil is a high energy supplement. 500 ml contains the equivalent of approx 1.5kg Oats or 1.3kg Corn. When used in conjunction with high energy grain diets the amount of grain or concentrate feeds used should be reduced accordingly.

When amounts exceeding 200 ml of Omega E Oil are to be fed, a period of conditioning is advised by building up gradually over 3 – 4 weeks to allow time for the digestive system to adapt.

### FEEDING RATE PER DAY:

See pack for detailed feeding instructions for different applications.  
Miniature Ponies – Do not exceed 25ml per day.

### CONTENTS

Cold Pressed Flaxseed Oil	995.7g
Natural Source Vitamin E	3000mg
Omega 3 Alpha Linolenic Acid Min	48.5%
