

Convenient paste
formulation for fast acting
**replacement of
electrolytes
lost in sweat.**

For horses in racing,
training, competition
travel or whenever
exertion or hot weather
causes copious sweating.

**DIRECTIONS FOR USE
& FEEDING RATE**

The paste may be added to feed or administered orally
onto the back of the tongue.

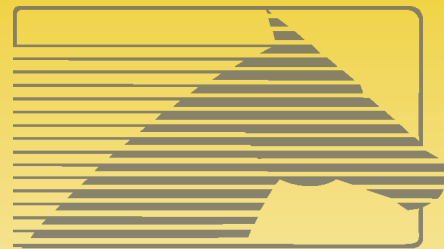

- Rate: 1 x 60ml syringe per 450kg bodyweight.
- Ponies 200–300kg bodyweight should receive half the above rate.
- Always ensure plentiful supply of clean water is available when using this product.
- May be used in addition to electrolytes from the normal feed ration.

**This product does not contain
restricted animal material.**

CONTENTS per 60ml

Sodium	8.7g
Chloride	13.7g
Potassium	3.7g
Magnesium	0.8g
Calcium	0.3g
Phosphorous	0.2g

Contains Red Fruit Flavouring

HORSEPOWER

**ELECTROLYTE
BALANCER**

BENEFITS

Electrolyte depletion through sweat losses can reduce appetite and hinder recovery from hard work. If appetite is reduced then intake of electrolytes in feed may be compromised. Using a fast-acting paste electrolyte provides rapid restoration of normal electrolyte balance in the body reducing the chance of dehydration and supporting normal appetite, water intake and recovery from exercise. Horsepower Electrolyte Balancer delivers fast acting salts in the same proportion as those lost in sweat in a palatable fruit flavoured paste.

Contains no buffers – suitable for endurance horses.

Quick acting for quick recovery.

PACK SIZES

Available in the following packs:
Single 60ml syringe
