

# High Protein, Low Starch, Low NSC extruded **complete feed** for Weanlings & Yearlings

HORSEPOWER

EXTRUDED

## LOW STARCH GROWER

### FEEDING RATE PER DAY:

Weanlings	2 kg
Yearlings	3 – 4 kg

### INGREDIENTS

Millrun, canola meal, lupin, barley, lime, salt, vegetable oil, zeolite, Horsepower trace element and vitamin premix.

### DIRECTIONS FOR USE & FEEDING RATE

- Adjust intake gradually and avoid sudden increases/spurts in growth rate
- Meadow, Clover or Grass Hays are preferred. If Lucerne hay is used ensure some wheaten hay or chaff is made available also.
- When young horses are boxed or kept in small yards ensure chaff is available.

Low starch high protein feeds may also be suitable for use in aged horses and those prone to digestive upsets or Laminitis.

### ANALYSIS per kg

Digestible Energy	13MJ
Protein	24%
Lysine	1.9%
Methionine	0.4%
Starch	12%
NSC	20%
Crude Fat	8.1%
Crude Fibre	8.2%
Calcium	1.4%
Phosphorus	0.7%
Potassium	0.9%
Sodium	0.4%

Salt	10g
Magnesium	0.4%
Iron	270mg
Zinc	275mg
Copper	80mg
Manganese	325mg
Sulphur	2.5g
Cobalt	2.1mg
Selenium	1.4mg
Iodine	1.0mg
Vitamin A - Retinol	5800IU
Vitamin D3	1000IU
Vitamin E	70mg

Vitamin B1 - Thiamine	21mg
Vitamin B2 - Riboflavin	4mg
Vitamin B3 - Niacin	200mg
Vitamin B5 -	
Pantothenic Acid	10mg
Vitamin B6 Pyridoxine	10mg
Biotin	640mcg
Folic Acid	1025mcg
Biotin	620mcg
Choline	1945mg
Zeolite	0.4%

NOTE: Starch and NSC may vary due to variable levels in raw materials.

### BENEFITS

**THE LOW STARCH ADVANTAGE FOR GROWING HORSES.** Traditional feeds made from grains and by-products derive energy from high starch and Non Structural Carbohydrate (NSC) content. This tends to favour the development of Insulin Resistance in pregnant mares and their offspring.

In turn, insulin resistance may result in higher rates of orthopaedic diseases like OCD in foals and yearlings. **This feed contains very low levels of starch, sugars and NSC.** Abundant energy is drawn instead from oil and fibre and combined with very high quality protein to safeguard against Insulin Resistance and Developmental Orthopaedic Disease in foals and yearlings. Like all Horsepower feeds it contains high levels of minerals and trace elements to help maintain peak health and condition.
