

High Protein, Low Starch, Low NSC complete extruded feed for Broodmares

HORSEPOWER

EXTRUDED

LOW STARCH BROODMARE

DIRECTIONS FOR USE & FEEDING RATE PER DAY

Empty Mares	2 - 3 kg
Pregnant Mares to 9th month gestation	3 - 4 kg
Pregnant Mares 9th months to term	4 kg
Lactating Mares	5 - 6 kg

Adjust intake according to body condition. Do not allow mares to become over fat prior to foaling.

INGREDIENTS

Millrun, Lucerne meal, micronised lupin, lime, DCP, salt, vegetable oil, Molophos®, zeolite, Vitamin E premix, Horsepower trace element & vitamin premix.

ANALYSIS per kg

Digestible Energy	13 MJ	Salt	10g	Vitamin E	130 mg
Protein	20%	Magnesium	0.4%	Vitamin B1 - Thiamine	22 mg
Lysine	1.8%	Iron	425 mg	Vitamin B2 - Riboflavin	3.9 mg
Methionine	0.3%	Zinc	280 mg	Vitamin B3 - Niacin	200 mg
Starch	14%	Copper	80 mg	Vitamin B5 - Pantothenic Acid	13 mg
NSC	21%	Manganese	345 mg	Folic Acid	825 mcg
Crude Fat	9.2%	Sulphur	9.0g	Biotin	480 mcg
Crude Fibre	8.8%	Cobalt	2.1 mg	Choline	630 mg
Calcium	1.6%	Selenium	1.3 mg	Zeolite	1%
Phosphorous	0.8%	Iodine	1.0 mg	NOTE: Starch and NSC may vary due to variable levels in raw materials.	
Potassium	0.9%	Vitamin A -Retinol	13120 IU		
Sodium	0.5%	Vitamin D3	1000 IU		

BENEFITS

THE LOW STARCH ADVANTAGE FOR BROODMARES. Traditional feeds made from grains and by-products use energy from high starch and Non Structural Carbohydrate (NSC) content.

This tends to favour the development of Insulin Resistance in pregnant mares and their offspring. In turn, Insulin Resistance may result in higher rates of orthopaedic diseases like OCD in foals and yearlings.

Mares which develop Insulin Resistance during a pregnancy are more likely to suffer it again during subsequent pregnancies.

This feed contains very low levels of starch, sugars and NSC. Abundant energy is drawn instead from oil and fibre and combined with very high quality protein to safeguard against Insulin Resistance during pregnancy and Developmental Orthopaedic Disease in foals.

Like all Horsepower feeds it contains high levels of minerals and trace elements to help maintain broodmares in peak health and condition.
