

HORSEPOWER®

GASTRI-SOOTHE

A complimentary mineral feed designed to neutralise stomach acid and work alongside ulcer treatments like Omeprazole and Sulcralfate to help heal gastric ulcers, protect stomach lining and support ongoing gastric health and comfort.

- **Rapid & Long-Lasting Antacid Effect.**
- **Ideal for long term use**
- **Natural & Non-Medicated**

Gastri -Soothe is suitable for all horses especially those being fed high energy diets whilst in training, sales preparation and competition or in any situation where stomach acidity may cause gastric discomfort.

INGREDIENTS

Magnesium as
Magnesium Oxide 10.1%

Calcium as
Calcium Carbonate 1.9%

Also contains wheat mill run and dehydrated molasses as flavouring and presented as a 3mm pellet for maximum palatability.

DIRECTIONS FOR USE & FEEDING RATE

FEEDING RATE per day

(1 level scoop = 50g)

1 Initial Rate for horses showing sign of gastric discomfort.

Adult Horses 450kg	200g
Yearlings 350kg	150g
Weanlings 250kg	100g
Warmblood 500kg	225g
Ponies 300kg	150g

2 Maintenance Rate

Adult Horses 450kg	150g
Yearlings 350kg	100g
Weanlings 250kg	75g
Warmblood 500kg	150g
Ponies 300kg	100g

The above amount to be divided into two and fed morning and night.

Feed the Initial Rate for 30 days followed by the Maintenance Rate

MEAT WITHHOLDING PERIOD: NIL

Product does not contravene the Rules of Racing or FEI Rules

BENEFITS & BACKGROUND

Gastri Soothe incorporates an imported specialised blend of Magnesium Oxide from multiple sources to provide differing particle sizes.

The kinetics of this formulation imparts both fast acting and sustained slow - release buffering to neutralise stomach acids.

Laboratory tested using gastric fluid drawn from the stomach of horses it demonstrated enhanced buffering capacity when compared to feed or laboratory grades of Magnesium Oxide. This makes it particularly suitable for use as an antacid. Laboratory testing was further supported by 350 gastroscopic examinations in live horses affected by ESGD Equine Squamous Gastric Disease. Double blind trials clearly showed significant reduction in mean ulcer scores over the 30- day trial period. By neutralising acid and raising the pH inside the stomach, Gastri - Soothe helps protect the stomach lining from acid attack and promotes enhanced gastric comfort.
