Phosphorous	53 g
Molasses	100 g
Salt	200 g
Canola Meal	20 g
Iron	2700 mg
Manganese	2815 mg
Sulphur	5000 mg
Zinc	2525 mg
Copper	740 mg
Selenium	15 mg
Iodine	15 mg
ZEOLITE	33 g

Note. This analysis represents the average nutrient composition of the entire product. Analysis of small samples may vary from the above.

DIRECTIONS FOR USE

- Block may be placed in feed bin or directly on the ground
- One 18kg Block per 10 Horses ideally placed 20-30 meters from water source
- Consumption rate 40-100g/day. Some animals may initially exceed this amount. Intake normally decreases to 40 - 100g within two weeks
- Not to be fed if horses are grazing Heliotrope or Patterson's Curse

For use in horses only.
Not to be fed to other stock.

This product does not contain restricted animal material.

BENEFITS

The Building Blocks of good nutrition.

Normal mineral blocks designed for cattle and sheep and are too low in some trace elements for horses.

Other blocks have up to 98% salt but Horsepower blocks are packed with minerals and trace elements and only 20% salt. The inclusion of 10% molasses gives the block a sweet smell and taste attractive to horses.

High 19% Calcium content boosts the intake of this critical mineral which is commonly deficient especially in pasture based diets.

Zeolite is included as a bio available source of Silica for connective tissue strength and also to neutralise mycotoxins from moulds which may contaminate hay and pasture.

PACK SIZES

Available in the following pack sizes:
18kg Blocks
*Available online by mail order from our website
